

Resolution presented by the delegation of

Israël

Theme Conflict and International Security

Concerning Worldwide terrorist financing and formal recognition of terrorist organizations

General Assembly,

Noticing a rise in extremist terrorist groups and organizations around the world, but most notably in the Middle East, have disturbed the livelihoods of many innocent citizens. With terrorist groups worldwide not being economically sanctioned by the United Nations, their influence is disrupting the lives of many innocent civilians is a violation of basic human rights to access of security.

Convinced that an economic international response to terrorism could end many domestic national security issues worldwide.

Estimating that terrorist organizations that are not economically cut may cause an increase in violent attacks around the world, evident in how Doha's 30 million monthly financial support of Hamas has led to the barbaric and gruesome deaths of innocent Israelis in 2023.

Lamenting how many issues in various regions around the world could have been avoided if the groups committing the acts were cut from their financial centres.

Dreading
countless the continuation of these atrocities that put an end to the life of innocent civilians.

Shocked By the way in which some countries are purposefully ignoring and denying that some organizations commit terrorist acts of great violence and barbary.

Propose - A review from the UN of terrorist activity around the world that are not considered as so by the UN security council.
- An investigation in individuals or groups financing terrorist activity around the world.
