

RESOLUTION IV – PLURINATIONAL STATE OF BOLIVIA / LEAGUE OF ARAB STATES

THEME : POLITICAL AND SOCIAL RIGHTS

CONCERN : THE CREATION OF A NEW CURRENCY FOR TRANSACTIONS IN BETWEEN NATIONS BASED ON GOLD, THE ARTIFICIAL INTERNATIONAL RESOURCE (AIR)

THE GENERAL ASSEMBLY,

- Preoccupied to see that the world continues to use the american dollar when a hegemony of this currency is the origin of the biggest economic crises of history like the oil crisis, the crisis of subprimes and the sanctions taken against Russia recently,
- Worried to see that nothing changes even though there exists a perpetual instability of the dollar and an inequality gap caused by its use,
- Outraged by the power that this currency gives to the United States, that lets them get into debt indefinitely and use the dollar as a political weapon to control the world economy,
- Taking into account that the dependency to the dollar of many member states of the United Nations slows down their economic growth, accentuating even more the American domination,
- Proposes the creation of a new currency whose annexation on gold as well as its collective reglementation will ensure the stability and the return of an international social justice,
- Reassures that the participating countries will benefit from monitoring along all the steps for the adhesion to the currency exchange rate in order to bring an economic balance and a monetary relaunch,
- Decides
- to introduce this new currency, the Artificial International Resource (AIR), in a maximum of countries members of the UNO for a usage that's exclusive to transactions between those nations in order to improve their economic, social and political health and to ensure a reliable future based on a neutral economy.
 - to create a new organization, the FinAncial Independent Regulator (FAIR), within the UNO to regulate the circulation of the AIR.
