

RESOLUTION VII – UKRAINE

THEME : CONFLICTS AND INTERNATIONAL SECURITY

CONCERN : PROHIBITION OF FINANCIAL OR MATERIAL SUPPORT TO WARS OF AGGRESSION

THE GENERAL ASSEMBLY,

Indignant	by the increasing number of wars of aggression which, in the four corners of the globe, kill innocent human beings,
Revolted	by the fact that in this same room, many countries such as the Russian Federation, the People's Republic of China and so many other countries finance by deceitful means certain armed conflicts,
Recalling	that all forms of financial or material support to a war of aggression is formally prohibited by the Charter of the United Nations which stipulates in Article 2, paragraph 4, that the members of the organization refrain, in their international relations to use threat or use of force either against the territorial integrity or political independence of any State, or in any other manner incompatible with the aims of the United Nations,
Noting	that through these illegal supports, these countries directly contradict the pacifist goals of the organization of the United Nations,
Flabbergasted	that the international community remain static in the face of these prolong the duration of these wars of aggression and thus increase the number of human losses,
Finds	that this phenomenon is so widespread today that Syria, Iran and Turkey are no longer even trying to hide the billions sent to the terrorist group Hamas,
Decides	<div>to seize the property and assets of States financially or materially supporting a war of aggression whose sole purpose is to shed blood ;</div> <div>- to sign a UN treaty prohibiting all countries sitting in this room from financing armed aggression in any way.</div>

The french text is binding.
